METHODOLOGY

For several years, Center Parcs conducts an annual Brand Monitor in the first half of May to track Brand Health and Brand Image.

- Quantitative online survey (hosted by a panel agency)
- 500 respondents per country (national representative on age, gender)
- The survey is conducted in The Netherlands, Belgium Flanders, Belgium Walloon, France, Germany, Denmark and NFM
- The respondent must have been on a paid short holiday in the past 3 years or have the intention to do so in the next year

This analysis is an extraction of the full Brand Monitor 2026.

For all Brand Health and Brand Image KPI's please refer to the Brand Monitor 2026.xls

Brand Health Indicators

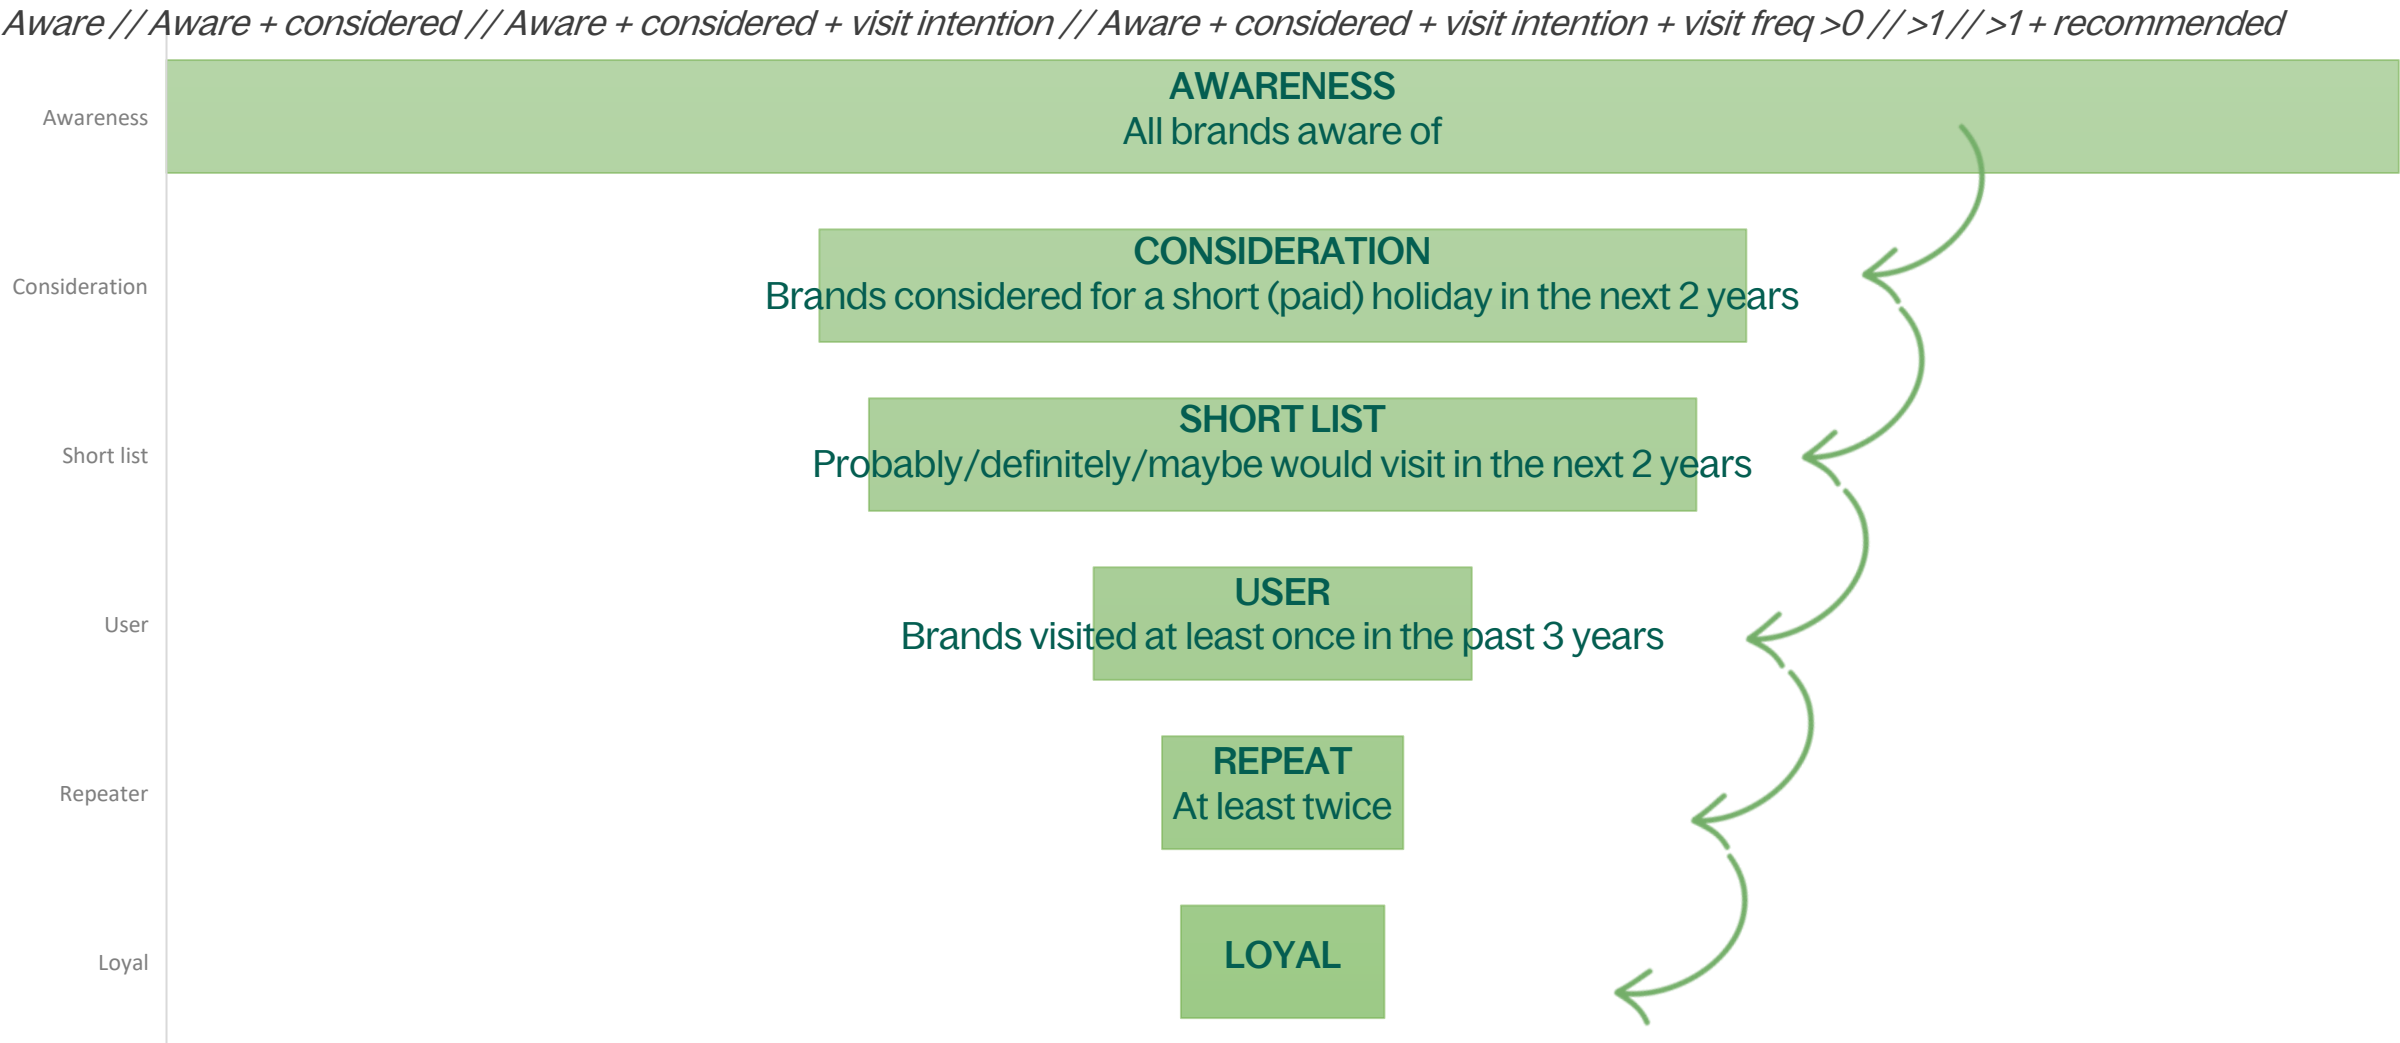

Brand Health performance is measured by the following **key performance indicators**:

Brand Awareness	Top of Mind Spontaneous	First brand mentioned spontaneously All brands mentioned spontaneously (including ToM)
	Aided Total	Brands recognized based on pre-coded list (can also include brands mentioned spontaneously) All brands aware off (spontaneous or aided)
Consideration	Brands considered for a short (paid) holiday in the next 2 years	
Preference	Preferred brand for a short (paid) holiday in the next 2 years	
Visit intention	Probably or definitely would visit the brand for a short (paid) holiday in the next 2 years	
Usage	Brands visited in the past 3 years for a short (paid) holiday	
Recommendation	Brands recommended to friends/family	

Consumer Disposition Funnel

The Consumer Disposition Funnel represents the conversion from one stage to another.

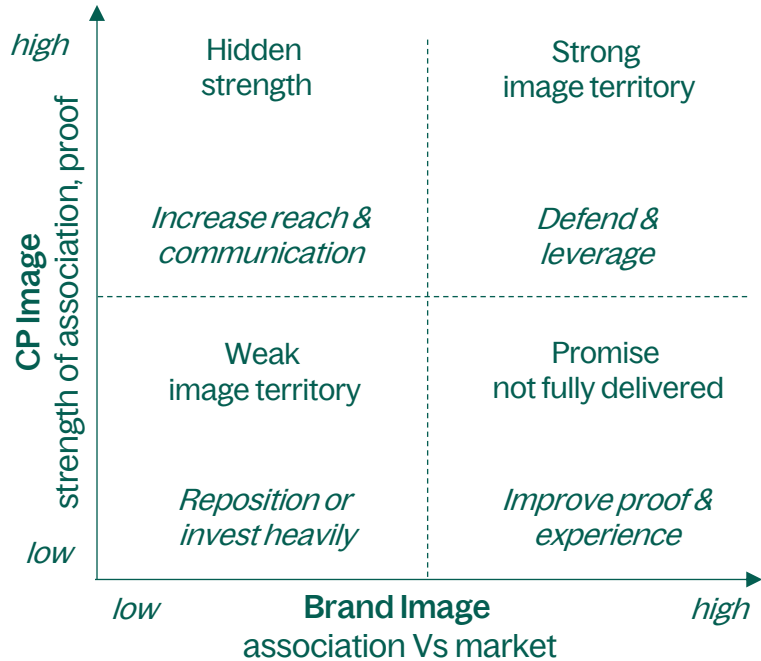

Brand Image Vs Center Parcs Image

Image is measured in the **width and depth** as a powerful framework for actionable insights:

Brand Image (width) ↔	POSITIONING Vs MARKET: association, promise WHY “Which associations with Center Parcs versus competitors?” HOW assign statements to brands WHAT actions related to <u>positioning</u>
Center Parcs Image (depth) ↕	PERCEPTION: strength of perceived association, proof WHY “To what extent is Center Parcs perceived on this association?” HOW agreement rating: how much do/ don’t you agree, scale 1-5 WHAT actions related to <u>enforce or correct perceptions & proof</u>

Example Germany

Brand Image
 32% (Vs 29% LY) associate Center Parcs with “variety in destinations/regions”,
 > indicating how this is linked to CP versus last year.

Center Parcs Image
 57% (Vs 65% LY) perceive Center Parcs as ‘experiencing the local region’.
 > indicating to which extent this is perceived versus last year.

The association remains strong, but perception of experiencing the region has weakened versus last year, indicating a need to reinforce proof.

MANAGEMENT SUMMARY

Overall stabilization – sustained last year's improved position, with market-specific developments:

- Increase in awareness for NL/GE/DK, stable performance for FR and slight decrease for BE
- Consideration & Preference stable for all markets except FR; decrease in Consideration
- Conversion ratio short list to user decreases for all markets except BE
- Stable brand image (width: positioning, association) for all markets except FR: focus needed on positioning
- Stable CP image (depth: perception, strength, proof) for NL/BE, weakened for FR/GR/DK: focus needed on proof

Goal remains to consider Center Parcs and book after short listing:

Strengthen Brand Awareness & Attractiveness, especially in growth markets

Build Value & Relevance in all markets, proof needed in growth markets

Brand Monitor 2026 – Key insights per market

The Netherlands

Sustained LY's improvement – increase awareness & purpose – Landal grows
